PERGAMON

computers & industrial engineering

An International Journal

Editor
Hamed K. Eldin
Industrial Engineering Department
College of Engineering
University of Iowa
Iowa City, IA 52242-1527, U.S.A.

Editorial Advisory Board

M. M. Ayoub
Texas Tech University

William E. Biles
University of Louisville

Tom M. Cavalier
Pennsylvania State University

M. I. Dessouky
Northern Illinois University

E. A. Elsayed
Rutgers University

Mikell Groover
Lehigh University

Yasser A. Hosni
University of Central Florida

C. Patrick Koelling
Virginia Polytechnic and State University

Way Kuo
Texas A & M University

Andrew Kusiak
University of Iowa

Jay Lee
National Science Foundation

John W. Nazemetz
Oklahoma State University

Peter O'Grady
Northern Carolina State University

Jason D. Papastavrou
Purdue University

Hamid R. Parsaei
University of Louisville

Charles M. Parks
Ohio University

William G. Sullivan
Virginia Polytechnic Institute

Ben Wang
FAMU/FSU College of Engineering

International

Animesh Basu
University of Wollongong, Australia

Hans-Jorg Bullinger
Fraunhofer-Institut IAO, Germany

Allan S. Carrie
University of Strathclyde, Scotland

T. C. E. Cheng
Hong Kong Polytechnic

G. Doumeingts
Universite Bordeaux 1, France

M. Sadek Eid
Université de Moncton, Canada

L. F. Gelders
Katholicke Universiteit, Belgium

Mitsuo Gen
Ashikaga Institute of Technology, Japan

T. J. Greene
Oklahoma State University

Jifa Gu
Chinese Academy of Sciences, P.R. China

Paul Higgins
University College Galway, Ireland

Hark Hwang
Korea Advanced Institute of Science & Technology

Takaya Ichimura
Nihon University, Japan

Moo Young Jung
Pohang University of Science & Technology, Korea

Mitsuru Kuroda
Aoyama Gakuin University, Japan

Myun W. Lee
Seoul National University, Korea

Beng S. Lim
Gintic Institute of Manufacturing Technology, Singapore

R. P. Mohanty
National Institute of Industrial Engineering, India

Allen Pugh
Indiana University—Purdue University

Stan Settles
University of Southern California

M. T. Tabucanon
Asian Institute of Technology, Thailand

Arabinda Tripathy
Indian Institute of Management, India

Yingluo Wang
Xi'an Jiaotong University, P.R. China

Thomas L. Ward
University of Louisville

Philip M. Wolfe
Arizona State University

Weixuan Xu
The Chinese Academy of Sciences, P.R. China

Publishing Office
Elsevier Science Ltd, Bampfylde Street, Exeter EX1 2AH, England [*Tel.* Exeter (01392) 51558; *Fax* (01392) 425370].

Subscription and Advertising Offices
North America—Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.
Rest of the World—Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, England [*Tel.* Oxford (01865) 843000; *Fax* (01865) 843010].

Frequency: Published 8 issues/annum in 2 volumes (Volume 28 published quarterly in January, April, July and October and Volume 29 as a complete volume of 4 issues published in September).

Subscription Rates
Annual Institutional Subscription Rates 1995: North, Central and South America, US$963.00, Rest of World £646.00. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Back Issues
Back issues of all previously published volumes are available direct from Elsevier Science Offices (Oxford and New York). Complete volumes and single issues can be purchased for 1990–1994. Earlier issues are available in high quality photo-duplicated copies as complete volumes only.

Second class postage paid at NEWARK NJ. Postmaster send address corrections to *Computers & Industrial Engineering*, Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

List of Contents

NUMBER 1

Review

Sengoda G. Shanmugham, Terrence G. Beaumariage, Chell A. Roberts and **Dwayne A. Rollier** — 1 — Manufacturing communication: a review of the MMS approach

Ali K. Kamrani, Henry A. Wiebe and **Chiu-Chi Wei** — 23 — Animated simulation of robot process capability

Colin O. Benjamin, Sheng-Chai Chi, Tarek Gaber and **Catherine A. Riordan** — 43 — Comparing BP and ART II neural network classifiers for facility location

Chuen-Sheng Cheng — 51 — A multi-layer neural network model for detecting changes in the process mean

Dar-Li Yang and **Maw-Sheng Chern** — 63 — A two-machine flowshop sequencing problem with limited waiting time constraints

Sabah U. Randhawa and **Raj Shroff** — 71 — Simulation-based design evaluation of unit load automated storage/retrieval systems

Jill A. Swift and **Joe H. Mize** — 81 — Out-of-control pattern recognition and analysis for quality control charts using LISP-based systems

Chinho Lin and **T. William Chien** — 93 — Maintenance system design problems for a flexible manufacturing system

Richard J. Tersine, Samir Barman and **Richard A. Toelle** — 107 — Composite lot sizing with quantity and freight discounts

Moutaz Khouja — 123 — The use of data envelopment analysis for technology selection

Suk-Hwan Suh, Sung-Kee Noh and **Yong-Jong Choi** — 133 — A PC-based retrofitting toward CAD/CAM/CNC integration

Kurapati Venkatesh and **Mohammad Ilyas** — 147 — Real-time Petri Nets for modeling, controlling, and simulation of local area networks in flexible manufacturing systems

K.-H. Wang and **C.-L. Chang** — 163 — Reliability of a controllable $M/M/2$ system with warm standbys operating under the triadic $(0, Q, N, M)$ policy

John W. Chinneck 179 Processing network models of energy/environment systems

Avneesh Prakash and **Mingyuan Chen** 191 A simulation study of flexible manufacturing systems

Notes and Queries

John D. Dennis 201 On magnificent solutions to insignificant problems

Kewei Lai 203 The only correct method to evaluate roundness

Announcements I

NUMBER 2

P. S. Welgama and **P. R. Gibson** 205 A hybrid knowledge based/optimization system for automated selection of materials handling system

Richard F. Deckro, John E. Hebert, William A. Verdini, Per Henning Grimsrud and **Satya Venkateshwar** 219 Nonlinear time/cost tradeoff models in project management

Chae Y. Lee and **Seok J. Kim** 231 Parallel genetic algorithms for the earliness–tardiness job scheduling problem with general penalty weights

Moncer Hariga 245 Comparison of heuristic procedures for the inventory replenishment problem with a linear trend in demand

Chandrasekhar Das 259 Selection and evaluation of most profitable process targets for the control of canning quality

Phillip A. Farrington, Bernard J. Schroer and **Jian Wang** 267 Front-end system for modeling modern apparel manufacturing systems

Kyung-Huy Lee and **Moo-Young Jung** 279 Flexible process sequencing using Petri net theory

Chang-Kyo Suh, Eui-Ho Suh and **Dong-Man Lee** 291 Artificial intelligence approaches in model management systems: a survey

Jean-Marie Bourjolly, Brahim Gaboune, Gilbert Laporte and **François Soumis** 301 Optimal policies for some discrete sequencing problems arising in flexible manufacturing

A. A. Bulgak, P. D. Diwan and **B. Inozu** 309 Buffer size optimization in asynchronous assembly systems using genetic algorithms

Vasanthakumar N. Bhat	323	A queueing model in an alternating random environment
A. K. Sarada, S. K. Khator and **L. C. Leung**	329	Distribution planning in an electric utility: feeder configurations
X. D. Fang and **Y. Zhang**	341	A new algorithm for minimising the surplus parts in selective assembly
Dong-wan Tcha, Chun-hyun Paik and **Won-taek Lee**	351	Throughput upper bounds for open Markovian queueing networks with blocking
Buddhadev Roychoudhury and **John F. Muth**	367	Tool path optimization procedures for machine tools
Daniel J. Crowley, Jonathan F. Bard and **Paul A. Jensen**	379	Using flow ratio analysis and discrete event simulation to design a medium volume production facility
Kwangsoo Kim and **Jaehun Jeong**	399	Tool path generation for machining free-form pockets with islands
C. Sylla	409	A penalty-based optimization for reservoirs system management
Notes and Queries		
Utpal Roy and **Xuzeng Zhang**	423	Comments on "The only correct method to evaluate roundness"
Announcements	I	

NUMBER 3

Dingwei Wang	425	Earliness/tardiness production planning approaches for manufacturing systems
Kun-Jen Chung	437	Economic design of control charts with two control limits
Jen-Gwo Chen, Deborah J. Fisher and **K. Krishnamurthy**	457	Development of a computerized system for fall accident analysis and prevention
Md. R. Rotab Khan and **Syed Abid Naqvi**	467	Simulation study of reaction times at varying visual angles
Wade C. Driscoll	473	$E_m/E_k/S$ queuing systems with state-dependent arrivals
Dake Sun, Li Lin and **Rajan Batta**	485	Cell formation using tabu search

COMPUTER-INTEGRATED MANUFACTURING

Hamid R. Parsaei, Ben Wang and **Richard A. Wysk**	495	Editorial
Joseph Sarkis, Adrien Presley and **Donald H. Liles**	497	The management of technology within an Enterprise Engineering framework
Saeid Motavalli, Mohammad Dadashzadeh and **Mohammad Taghavi-Fard**	513	A proposed framework and a survey of research issues in manufacturing information systems
Cheng Hsu, Jangha Cho, Lester Yee and **Laurie Rattner**	523	Core information model: a practical solution to costly integration problems
Tor Guimaraes, Youngohc Yoon and **Quinton O'Neal**	545	Success factors for manufacturing expert system development
Youngsup Joo and **Russell R. Barton**	561	Integrated product and process design through feedback of manufacturing experience
Russell E. King and **Kyung Sup Kim**	575	AgvTalk: an object-oriented simulator for AGV systems
C. Alec Chang and **Chao-Ton Su**	593	A comparison of statistical regression and neural network methods in modeling measurement errors for computer vision inspection systems
S. M. Alexander, J. H. Graham, J. Guan and **Won Young Lee**	605	A functional approach for the concurrent design of diagnostic systems
Jong-Shin Liau, Robert E. Young and **Peter O'Grady**	615	Combining process planning and concurrent engineering to support printed circuit board assembly
Richard A. Wysk and **Jeffrey S. Smith**	631	A formal functional characterization of shop floor control
John W. T. Lee, Stephen C. F. Chan and **Daniel S. Yeung**	645	Modelling constraints in part structures
Anup Kumar, Rakesh M. Pathak, Yash P. Gupta and **Hamid R. Parsaei**	659	A genetic algorithm for distributed system topology design
Suraj M. Alexander, Matthew A. Dillman, John S. Usher and **Biju Damodaran**	671	Economic design of control charts using the Taguchi loss function

NUMBER 4

W. C. Ng	681	Determining the optimal number of duplicated process tanks in a single-hoist circuit board production line
Seok J. Koh and **Chae Y. Lee**	689	A tabu search for the survivable fiber optic communication network design
K. S. Hindi	701	Solving the single-item, capacitated dynamic lot-sizing problem with startup and reservation costs by Tabu search
K. S. Hindi	709	Computationally efficient solution of the multi-item, capacitated lot-sizing problem
Chae-Bogk Kim, Bobbie L. Foote and P. Simin Pulat	721	Cut-tree construction for facility layout
F. Kolahan, M. Liang and **M. Zuo**	731	Solving the combined part sequencing and tool replacement problem for an automated machining center: a Tabu search approach
Michael J. Brusco and **Tony R. Johns**	745	Improving the dispersion of surplus labor in personnel scheduling solutions
S. K. Goyal and **A. Gunasekaran**	755	An integrated production-inventory- marketing model for deteriorating items
Hyo-Seong Lee	763	On continuous review stochastic (s, S) inventory systems with ordering delays
Christian N. Madu, Chu-hua Kuei and **Jau-Hwei Chen**	773	A decision support systems approach to adjust maintenance float system availability levels
Minnie H. Patel	787	A linear program to detect extrapolation in predicting new responses of a multiple linear regression model
Jay Lee	793	Modern computer-aided maintenance of manufacturing equipment and systems: *review and perspective*
Hong Wang and **WanSoo T. Rhee**	813	An algorithm for estimating the parameters in multiple linear regression model with linear constraints
K. K. George and **N. Ramesh Babu**	823	On the effective tool path planning algorithms for sculptured surface manufacture
Khalil S. Hindi and **Eugeniusz Toczyłowski**	839	Detailed scheduling of batch production in a cell with parallel facilities and common renewable resources
Konstantin Kogan and **Eugene Khmelnitsky**	851	An optimal control method for aggregate production planning in large-scale manufacturing systems with capacity expansion and deterioration

J. Lyu, A. Gunasekaran, C. Y. Chen and **C. Kao**	861	A goal programming model for the coal blending problem
Gur Mosheiov	869	Scheduling jobs with step-deterioration; minimizing makespan on a single- and multi-machine
Christian N. Madu and **Chu-hua Kuei**	881	Stability analyses of group decision making
Zvi Drezner	893	Spherical approximations for minimax optimization problems
Taehoon Park and **Chae Y. Lee**	899	Algorithms for partitioning a graph
Zhiwei Zhu, Ronald B. Heady and **Stephen Reiners**	911	An efficient zero–one formulation of the cell formation problem
Sanjay S. Jagdale and **K. K. Wang**	917	Planning for the manufacture of axisymmetric parts: an AI-based approach
Diatha Krishna Sundar and **Damodar Acharya**	927	Blast schedule planning and shiftwise production scheduling of an opencast iron ore mine
Announcements	I
